Architecture Performance Tool

**Date / Datum** 16.06.2020

**Group of topics /  
Themenblock** Market  
Markt

**Language /  
Vortragssprache** English/ Englisch

**Content / Inhalt** Since the last Berlin World Green Infrastructure Congress in 2017, there have been several important policy and standard developments. This presentation will provide an overview of the cities of San Francisco, Denver, Portland and New York, all of which have adopted mandatory green roof requirements. The Living Architecture Performance Tool (LAPT) was launched in 2019. The LAPT is a comprehensive third party rating system to evaluate green roof and wall projects, based on the rating systems of LEED and Sustainable Sites. The LAPT is designed as a tool for policy makers, designers, manufacturers and owners to obtain the maximum number of benefits from green roof and wall projects and to provide some assurance that they will perform well.
